Please note the comments from Robert Talbot, our former board President from around 2008 to 2017, to my reach out about natural gas at 1 McGill.

Hope this helps clarify, I removed other non 1 McGill related text from his response.

Regards

Mel

Hi Mel.

We introduce gaz in the building around 2005 when we had to fix the problem with the fireplace of all condo 18 (118,218,318,418....) that were not working because of a misconception in the surrounding structure that kept the chimney always cold.

At that time the full project was paid 50k\$ by the promoter, 50K\$ by the syndicate and each co-owner of the 18' had to pay for is new gaz fireplace.

Best regards.
Robert.
